Skills

- **Languages**: C++, Python, JavaScript, Java, PHP
- **Frameworks**: HTML and Tailwind CSS, NodeJS, ExpressJS, ReactJS, Fast API
- **Tools/Platforms**: MySQL, MongoDB, PostgreSQL, Polars, Git/GitHub
- **Soft Skills**: Problem-Solving, Team Player, Quick Learner, Adaptability

Projects

- **Smart Fertilizer Planner**: | GitHub Nov 2025
  - Designed an AI-assisted fertilizer recommendation system integrating soil parameters, crop type, and geolocation-based weather data for optimized nutrient planning.
  - Designed a clean dashboard for land-parcel management, with real-time MIS reports and GIS-based visualization of soil and crop insights.
  - Developed backend APIs to generate dynamic fertilizer plans, automate data flow, and ensure seamless interaction between the platform and database.
    Tech: MERN Stack, GIS Tools, REST APIs

- **Stock-Technical-Indicator-API**: | GitHub Aug 2025
  - Developed a Fast API-based stock indicator API providing SMA, EMA, RSI, MACD, and Bollinger Bands with fast Polars processing.
  - Added API key auth, tier-based access (Free/Pro/Premium), rate limiting, and in-memory caching.
  - Deployed on Render with Neon DB PostgreSQL and fully documented Swagger endpoints.
    Tech: Fast API, Python, Polars, PostgreSQL, Render**.**

- **AI Interview Practice Platform**: | GitHub Jan 2026
  - Built a real-time coding interview platform with code execution, test case validation, and live interaction using Scocket.io
  - Added proctoring features such as tab-switch detection and face presence monitoring to simulate interview conditions.
    Tech: React, Node.js, Express.js, Socket.io, WebRTC, PostgreSQL

Training

Data Structures and Algorithms – Centre Professional Enhancement (LPU) | Certificate Jul 2025
- Completed a six-week training at Lovely Professional University, focusing on core data structures and algorithms.
- Built an interactive Java-Swing based DSA Visualizer with insert, delete, and search operations across multiple data structures.
- Applied OOP concepts and GUI programming to simplify complex DSA concepts through real-time visual representation.

Certificates

- Computer Networking course authorized by Google and offered through Coursera. | Certificate Sep 2024
- Operating Systems course authorized by IBM and offered through Coursera | Certificate Sep 2024
- Full-Stack Web Development Bootcamp by Udemy | Certificate Nov 2025
- Build Generative AI Apps and Solutions with No-Code Tools By Infosys Springboard | Certificate Sep 2025

Achievements

- Solved 150+ problems on LeetCode Nov 2025
- 5-star in C++, 4-star in Python on Hacker Rank Nov 2025

Education

Lovely Professional University Phagwara, Punjab
Bachelor of Technology - Computer Science and Engineering; ***CGPA: 7.02*** Aug 2023 - Present

Sri Abhida Junior Collage Hyderabad, Telangana
Intermediate; ***Percentage: 87*** Apr 2021 – Mar 2023

Vinners Olympiad School Nirmal, Telangana
Matriculation; ***Percentage: 97*** May 2020-Apr 2021
